BOURBON Financial information Q3 and 9 months 2016

**Adjusted revenues for the first 9 months amounted to €858.2 million, down 22.2%;
 3rd quarter adjusted revenues were down 9% compared with previous quarter**

As anticipated, the offshore oil and gas marine services market is hitting a low point in the second half of 2016.

- The decrease of 4.5 points in fleet utilization rates compared with the previous quarter, to 59.7%, was primarily due to the slowdown in activity in the Shallow and Deepwater offshore segments.
- The number of stacked vessels at end-September, excluding Crew boats, was 85 vessels.
- Prices remained stable compared with the previous quarter, but have decreased by 15% year-on-year.
- The current quarter is expected to see comparable performances, with a slight improvement in the Subsea and Crew boat segments, and activity remaining challenging in Shallow and Deepwater offshore.

“The expectations of a potential rebalancing of oil supply and demand in 2017 on account of the sharp drop in investment by oil companies, as well as the search for agreements between producer countries, may mark the start of a recovery in activity”, declared Jacques de Chateauvieux, Chairman and Chief Executive Officer of BOURBON Corporation.

“In this perspective, BOURBON is focusing on operational excellence and cost control, with a long-term vision where the benefits of the digital revolution could prove decisive.”

(a) Adjusted data:

The adjusted financial information is presented by Activity and by Segment based on the internal reporting system and shows internal segment information used by the principal operating decision maker to manage and measure the performance of BOURBON (IFRS 8). As of January 1, 2015, the internal reporting (and thus the adjusted financial information) records the performance of operational joint ventures on which the group has joint control using the full integration method. Adjusted comparative figures are restated accordingly.

* Vessels operated by BOURBON (including vessels owned or on bareboat charter).

Adjusted revenues continue to suffer from the decrease in demand in both Deepwater and Shallow water offshore. This is amplified by vessel overcapacity in these two segments. In contrast, the Crew boats segment is proving robust.

Marine Services: Deepwater offshore vessels

* Vessels operated by BOURBON (including vessels owned or on bareboat charter).

Adjusted 3rd quarter revenues in the Deepwater offshore segment resisted from one quarter to the next, in particular thanks to higher utilization and daily rates in the Europe/MMI and Americas regions. West Africa area continued to suffer from a very tense market. BOURBON accordingly continued its proactive cost reduction measures, stacking up to 22 vessels in the 3rd quarter.

Marine Services: Shallow water offshore vessels

	Quarter				9 months		
	Q3 2016	Q3 2015	Var 2016/ 2015	Q2 2016	2016	2015	Var 2016/ 2015

Average daily rate (in US\$/day)	10,365	12,880	-19.5%	10,712	11,061	13,457	-17.8%

* Vessels operated by BOURBON (including vessels owned or on bareboat charter).

Third quarter revenues were hit by a market that deteriorated severely particularly in this segment (-9.4 pts in utilization rates compared with the previous quarter) and especially in West Africa, in addition to the region's annual seasonal effect during this period. The Europe/MMI region benefited from long-term contracts, notably in Egypt and Saudi Arabia.

BOURBON continued to adapt its costs to market conditions over the quarter, stacking up to 59 vessels.

Marine Services: Crew boat vessels

Average daily rate (in US\$/day)	4,473	4,632	-3.4%	4,405	4,477	4,771	-6.2%

Adjusted revenues in the Crew boats segment rose slightly compared with the previous quarter, with heightened demand for large Crew boats representing an economic alternative to transport by helicopter. This is the only segment to see average daily rates increase slightly.

* Vessels operated by BOURBON (including vessels owned or on bareboat charter).

Adjusted revenues remained down, with 6 vessels being stacked in the 3rd quarter. The 1-point improvement in the utilization rate compared with the previous quarter reflects BOURBON's proactive strategy of entering new Shallow water offshore markets thanks to its partners' network, in particular in East Asia, where 2 Bourbon Evolution vessels are now operating. BOURBON is continuing its strategy of diversification by extending its range of services: installation/laying, inspection & assistance, ROV, diving support, well stimulation, flotels, etc.

Activities included are those that do not fit into either Marine Services or Subsea Services. Making up the majority of the total are earnings from such items as miscellaneous ship management activities, logistics as well as from the cement carrier Endeavor.

OUTLOOK

In a context marked by the upward revision of the demand for oil in 2017, inventory stagnation and an offering that is expected to contract, given the reduction in investment over the past two years, we are seeing signs of a return to growth, albeit with a time lag.

Clients are going to increase maintenance operations on installations and embark on projects to extend existing facilities.

In the first half of 2017, the impact on our Deepwater and Shallow water offshore supply vessel segments will be very limited, with drilling activity remaining at very low levels; however, this impact will in all likelihood be more visible in our Crew boat and Subsea/ maintenance support activities from early 2017.

BOURBON is therefore continuing its efforts to streamline operations reduce costs and preserve cash, with the same objective of "operational excellence".
