Six new Crewboats chartered to support operations on the Eni Offshore fields In Congo

BOURBON announces the signature of a five-year contract with Eni Congo for the renewal of its crewboat fleet. This contract marks a strategic milestone to further reduce the emission associated to the offshore transport of personnel.

The contract covers the charter of six new, latest-generation S200X-G2 units, scheduled to be commissioned progressively between June and December 2026. Pending delivery, six front runners will be temporarily mobilized to ensure operational continuity from the start of the contract.

A new generation of vessels combining performance and energy efficiency

Developed to meet Eni's operational and environmental requirements, this new serie is based on the successful design of Surfers 200x-G delivered in 2024 presenting **significant fuel savings in transit estimated at 20% versus previous generation**, thanks to an optimized hydrodynamic design and propulsion system, and the integration of a real-time energy performance monitoring system (EFMS) tailored to the vessel and built-in during construction.

These 20-meter vessels will also offer:

- 30 passenger seats with enhanced comfort (new comfortable seats with USB sockets, high-performance air conditioning, large screens, etc.)
- 25 m² of foredeck space, for carrying small parcels
- A redesigned navigation bridge, with improved visibility and enhanced ergonomics for pilots

The six new units will operate on the Eni offshore fields supporting their 2 FNLG units, with reinforced operational support from Bourbon Congo.

François Leslé, CEO of Bourbon Mobility: "This strategic contract confirms our ability to provide reliable, innovative and responsible marine solutions. With this new fleet, we are reinforcing our commitment to offshore mobility that is more sustainable, more efficient and perfectly aligned with the expectations of our major customers."

ABOUT BOURBON

Operating in over 35 countries, BOURBON supports its customers by providing a wide range of innovative and sustainable marine services on oil, gas and wind fields. With a fleet of 223 modern, standardized vessels, the company and its 5,850 employees are working to achieve one ambition: to be the partner of choice for the major players in offshore energy. The group aims to contribute to the development of offshore energies, while at the same time committing itself to the transformation of this industry and becoming a company that sets the standard for the energy transition.

Deeply rooted in local environments, BOURBON makes proximity to customers one of its primary assets. Its worldwide network of shipmanagers, subsidiaries and partners enables it to operate anywhere in the world with the same level of quality and safety.

BOURBON comprises three main activities (Marine & Logistics, Mobility and Subsea Services) and generated sales of 733 million euros in 2024.
