

WEAR THE RIGHT PPE AT ALL TIME!

Wearing safety equipment is the last barrier to avoid injury. The 3 examples you will find in this Safety Post illustrate their ability to protect you from hazard. In all circumstances, wear PPE, but above all, wear the right PPE! Simple safety glasses do not protect you from the explosion of a grinding disc, not all gloves are suitable for the same types of operations, bump caps worn in the engine room should not be worn on the deck of a vessel, etc. Be vigilant and do not be complacent when facing hazards. Wear your PPE, protect yourself!

THE SAFETY POST IS INSPIRED FROM REAL EVENTS - PLEASE PRINT, POST AND DISCUSS THIS ISSUE!

LIFE SAVING RULES

Use the appropriate PPE for the task.

Wear a personal flotation device whenever required.

Check the condition of PPE and report any damage. Remove damaged PPE from use.
