

RESPECT SAFETY BARRIERS!

In this edition of Safety Post we reflect on an avoidable injury. A warehouse employee did not respect the PPE policy. His colleague did not “stop the job”. PPE is a defence barrier, so is calling a “stop work” for safety. Both barriers must always be respected. **With these barriers respected, would there have been an injury?**

RESPECT SAFETY BARRIERS!

DO:

- Wear the correct PPE for every task.
- Use your STOP WORK authority.
- Respect all safety barriers.

DON'T:

- Allow colleagues to endanger themselves.
- Leave tools or equipment lying around – ensure a tidy workplace.
- Underestimate risk in routine tasks.
